### MESSAGE

Department of Chemicals and Petrochemicals is highly importance due to its relevance under the Ministry of Chemicals & Fertilizers. The importance of Chemicals and Petrochemicals in day to day life needs no elaboration. The share of this sector is quite significant in manufacturing and, therefore, its contribution is very important for developing Indian economy. I am glad to see that the Department is striving hard to provide more conducive atmosphere to the Industry for achieving higher and sustainable growth. The efforts of the Department will definitely pave way for realization of our dream 'Skill India' and 'Atmanirbhar Bharat' for better tomorrow.

2. I am very happy to know that Statistical Publication 'Chemical & Petrochemical Statistics at a Glance-2019' is being brought out by the Department this year even in the hard time of the current pandemic situation due to COVID-19. I hope this publication would be found very useful by all the data users and organizations associated for the development of chemical sector in the country.

3. I wish to record my appreciation for the excellent work done by the Department under the able guidance of Shri R. K. Chaturvedi, the Secretary of the department.

MESSAGE

Department of Chemicals and Petrochemicals, Ministry of Chemicals and Fertilizers is dedicated to the service of the nation and activity contributing towards promotion of the Chemicals and Petrochemicals Sector. The share of this sector in manufacturing is quite significant, therefore, contribution of the sector to the country's economy is very important.

I am pleased to note that the Department of Chemicals & Petrochemicals is bringing out this Annual Publication "**Chemicals & Petrochemicals Statistics at a Glance-2019**" this year with added new features making it more informative.

I acknowledge the excellent work done by the officers of the Department of Chemicals & Petrochemicals under the guidance of Secretary (C&PC) in bringing out this publication.

My best wishes to all concerned.

(Mansukh Mandaviya)

## Foreword

The chemical industry continues to be impacted by the globalization and integration of the world economy. Department of Chemicals and Petrochemicals is endeavoring to address issues and concerns faced by the Chemical Industry to ensure more conducive and hassle-free environment. The Department is implementing various policies and programmes for achieving sustainable growth in the development of the chemical sector.

2. I am pleased to know that Statistical Publication 'Chemical & Petrochemical Statistics at a Glance-2019' is being brought out by the Statistics and Monitoring Division this year including statistical analysis on various key indicators such as Installed Capacity, Consumption, Production, Import and Export of Chemicals and Petrochemicals in the country.

3. I would wish to commend the excellent work done by the Statistics and Monitoring Division in the Department under the able leadership of Shri N K Santoshi, Deputy Director General, Department of Chemicals & Petrochemicals.

Congratulations to all.

## P R E F A C E

I am very happy to bring out the Statistical Publication '**Chemicals & Petrochemicals Statistics at a Glance-2019**' compiled by Statistics & Monitoring Division under the Department of Chemicals and Petrochemicals, Ministry of Chemicals and Fertilizers. S&M Division besides compiling Statistics on Selected Major Chemicals and Petrochemicals for internal use in perspective planning, also caters to the requirement of data for All India Index of Industrial Production (IIP) brought out on monthly basis by Central Statistics Office, Ministry of Statistics & Programme Implementation. The Statistics presented in this publication includes inter alia Production, Installed Capacity, Consumption, Import and Export in respect of Selected Chemicals and Petrochemicals.

2. I sincerely acknowledge and express my gratitude to Ministries / Departments / Organizations viz. M/o Statistics & PI , M/o Commerce & Industry, M/o PNG , DGFT , DGCI&S and DIPP, etc. for providing valuable input for this publication through their websites. I express my sincere thanks to various Divisions of this Department for providing valuable inputs and cooperation towards compilation of this publication.

3. I would like to place on record my appreciation for the efforts put in by the officers of S&M Division of the Department namely; Shri Ram Sajeewan, Deputy Director, Shri Rajat, Research Officer and Shri Rakesh Kumar, Junior Statistical Officer. I hope this publication would be useful for data users in government, research institutions and other stakeholders associated with chemical industry.

4. I hope this publication will be useful to planner, policy makers, academicians and researchers. Suggestions/ Comments from users of this publication are most welcome for future improvement.

July, 2020

New Delhi

(N K Santoshi)  
Deputy Director General

## **CONTENTS**

<b>Description</b>	<b>Page No.</b>
Message from Hon'ble Minister	
Message from Hon'ble Minister of State	
Foreword from Secretary	
Preface	
Introduction	6-9
Acronyms	10-11
Coverage, Data Sources, Definitions & Limitations	12-17
Chapter 1: An Overview of Chemical and Petrochemical Sectors	18-22
Chapter 2: Global Scenario	23-24
Chapter 3: Important Economic Indicators	25-30
Chapter 4: Indian Trade Classification (Harmonized System) [ITC(HS)]-2017– An Abstract	31-32
Chapter 5: National Industrial Classification (NIC) – A Digest	33-35
Chapter 6: Indices released by Government of India	36-41
Chapter 7: Glimpses of Important Trends during 2014-15 to 2018-19	42-82

## **Appendices :**

### **Section – I Chemical Sector**

Table -1	Performance of Selected Major Chemicals (Group-wise) during 2011-12 to 2018-19 at a Glance	83
Table -1A	Projection of Production, Installed Capacity, Export and Import of Selected Major Chemical (Group-wise) from the year 2019-20 to 2024-25	84
Table -2	Production, Installed Capacity & Growth of Selected Major Chemicals (Group –wise) during 2011-12 to 2018-19	85
Table -3	Production, Capacity Utilization & Growth of Major Chemicals (Product–wise) during 2011-12 to 2018-19	86-91
Table -4	Installed Capacities of Selected Chemicals (Group-wise) during 2011-12 to 2018-19	92
Table -5	Consumption of Selected Major Chemicals (Product -wise) during 2011-12 to 2018-19	93-94
Table -5A	Consumption of Chemical Pesticides in various States/UTs During 2011-12 to 2018-19	95-96

### **Section – II Petrochemical Sector**

Table - 6	Performance of Selected Basic Major Petrochemicals (Group-wise) during 2011-12 to 2018-19 at a Glance	97
Table – 6A	Projection of Production, Installed Capacity, Export and Import of Selected Basic Major Petrochemical (Group-wise) from the year 2019-20 to 2024-25	98
Table- 7	Production, Installed Capacity & Growth of Selected Basic Major Petrochemicals (Group- wise) during 2011-12 to 2018-19	99
Table – 8	Production, Capacity Utilization & Growth of Selected Major Petrochemicals (Product-wise) during 2011-12 to 2018-19	100-103
Table – 9	Installed Capacities of Selected Major Petrochemicals (Group-wise) from 2011-12 to 2018-19	104
Table - 10	Consumption of selected Major Petrochemicals (Product wise) during 2011-12 to 2018-19	105-107

### **Section-III Foreign Trade**

Table – 11	Exports and Imports of Chemicals (excluding Pharmaceutical Products and Fertilizers) during 2011-12 to 2018-19	108
Table – 12	Exports and Imports of Chemicals and Petrochemical Products (including Pharmaceutical Products and Fertilizers) during 2011-12 to 2018-19	109
Table – 12A	Net Imports of Chemicals and Chemical Products (excluding Pharmaceutical Products and Fertilizers) during 2011-12 to 2018-19	110
Table – 13	Exports of Major Chemicals (Group-wise) during 2011-12 to 2018-19	111
Table – 14	Imports of Major Chemicals (Group-wise) during 2011-12 to 2018-19	112
Table – 15	Net Imports of Major Chemicals (Group-wise) during 2011-12 to 2018-19	113
Table – 16	Exports of Major Chemicals (Product-wise) during 2011-12 to 2018-19	114-117
Table – 17	Imports of Major Chemicals ((Product-wise) during 2011-12 to 2018-19	118-121
Table – 18	Net Imports of Major Chemicals (Product-wise) during 2011-12 to 2018-19	122-125
Table – 19	Top Five Export Destinations of Selected Chemicals During 2018-19	126-133
Table – 20	Top Five Sources (countries) of Import of selected Chemicals to India during 2018-19	134-140
Table – 21	Exports of Major Petrochemicals (Group-wise) during 2011-12 to 2018-19	141
Table – 22	Imports of Major Petrochemicals (Group-wise) during 2011-12 to 2018-19	142
Table – 23	Net Imports of Major Petrochemicals (Group-wise) during 2011-12 to 2018-19	143
Table – 24	Exports of Major Petrochemicals (Product-wise) 2011-12 to 2018-19	144-148
Table – 25	Imports of Major Petrochemicals ((Product-wise) during 2011-12 to 2018-19	149-153
Table – 26	Net Imports of Major Petrochemicals (Product-wise) during 2011-12 to 2018-19	154-159
Table – 27	Top Five Export Destinations of Selected Petrochemicals During 2018-19	160-166
Table – 28	Top Five Sources (countries) of Import of selected Petrochemicals to India During 2018-19	167-173

Table – 29	Exchange Rates of Indian Rupee vis-a-vis US\$	174-175
Table – 30	World Exports of Chemicals by top 10 countries-2018	176-178
Table – 31	World Imports of Chemicals by top 10 countries-2018	179-181
Table – 32	India's share in World Exports and Imports of Chemicals -2018	182

#### **Section-IV Foreign Direct Investment (FDI)**

Table – 33	Sector –wise FDI Inflows during 2017-18 to 2018-19 (in US \$ million)	183
------------	---	-----

#### **Section-V Index of Industrial Production**

Table – 34	Monthly Production Growth in 'Chemicals and Chemical Products' vis-a-vis Manufacturing Sector during April 2018 to March 2019 (Based on Index of Industrial Production with base year: 2011-12)	184
Table – 35	Annual Production Growth in Chemicals and Chemical Products Vis -a-Vis Manufacturing Sector during 2013-14 to 2018-19 (Based on Index on Industrial Production with base year: 2011-12)	185
Table – 36	Weights of Products Covered Under Chemical and Chemical Products (Industry Division 20 of NIC- 2008)	186-187

#### **Section-VI Inflation Based on Wholesale Price Index**

Table – 37	Annual Inflation of Chemicals & Chemical products vis-à-vis other commodities during 2013-14 to 2018-19 (Based on Wholesale Price Index with base year: 2011-12)	188
Table –38	Monthly Inflation of Chemicals & Chemical Products vis-a-vis Other Commodities during April, 2018 to March, 2019 (Based on Wholesale Price Index with base year: 2011-12)	189
Table –39	WPI (Base year 2011-12) of Chemicals & Chemical Products (Group Wise) during 2013-14 to 2018-19	190

#### **Section-VII Miscellaneous**

Table –40	Selected Indicators of the Indian Economy	191
Table –41	Growth Rates of Core Industries (%) (Base Year: 2011-12)	192

Table –41A	Index of Core Industries (Base Year: 2011-12)	193
Table –42	Consumption of Naphtha, Natural Gas and Fuel oil	194
Table –43	Important Indicators of Industry Division 29, 21 (Unincorporated Sector) in 2015-16 (July 2015- June 2016)	195
Table –44	Employment in Chemicals and Chemicals products ( Industry Division 20, NIC-2008) during 2011-12 to 2016-17	196
Table –45	Gross Value Added from Chemical and Chemical products (Industry Division 20: NIC 2008) and Pharmaceutical; medicinal chemicals and botanical product (Industry Division 21: NIC 2008) vis-a-vis Manufacturing sector and all Economic Activities (at Current prices)	197
Table –46	Gross Value Added from Chemical and Chemical products (Industry Division 20:NIC 2008) and Pharmaceutical; medicinal chemicals and botanical product (Industry Division 21: NIC 2008) vis-a-vis Manufacturing sector and all Economic Activities (at constant prices) (2011-12)	198
Table –47	Value of Output from Chemicals and Chemical products ( Industry Division 20: NIC 2008) and Pharmaceutical; medicinal chemicals and botanical product (Industry Division 21: NIC 2008) vis-a-vis Manufacturing sector (at Current prices)	199
Table –48	Value of Output from Chemicals and Chemical products ( Industry Division 20: NIC 2008) and Pharmaceutical; medicinal chemicals and botanical product (Industry Division 21: NIC 2008) vis-a-vis Manufacturing sector (at constant prices) (2011-12)	200
Table –49	All India Estimate of Selected Characteristics of Factory Sector for Chemical and Chemical products (Industry Division 20: NIC 2008), Pharmaceutical; medicinal chemicals and botanical product (Industry Division 21: NIC 2008) and manufacture of Magnetic and Optical Media (Industry Division 268)	201
Table –50	State wise Estimate of Selected Characteristics of Factory Sector for Industry Division 20: NIC 2008: Chemicals and Chemical Products	202
Table –51	Production , import , Export , Consumption of Major Chemicals and Petrochemicals and Export as % of Production and Imports as % of Consumption	203-204
Table –52	Exports of all Chemicals as % of Value of output and Imports of all Chemicals as % of Consumption	205

## **Introduction**

Chemical and Petrochemical sector is one of the pioneering sectors having bearing on day to day needs of the society. Presence of Chemicals and Petrochemicals can be seen in everyday life of the people at large scale. Chemical Industry contribute significantly for the economic development and growth of various key sectors in the country such as automotive, construction, electronics, health care, textiles and fast moving consumer goods (FMCG). Government initiatives such as Make in India, Skill India, Digital India etc to become Atam Nirbhar Bharat. The government is in the process to reform the old Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy notified to attract mega investments which suitable incentives in these large investment regions to transform India into global chemical manufacturing hub. This will help to realize India's vision of becoming US \$ 5 trillion economy and provide substantial employment to the youth. The share of Gross Value Added (GVA) in the Manufacturing Sector during 2017-18 is about 9.06%. GVA of Chemical Sector has grown with CAGR of 12.47% during the period 2012-13 to 2017-18.

2. The Statistics and Monitoring (S&M) Division of the Department compiles statistics on monthly production data and on installed capacity of selected Chemicals and Petrochemicals products from Large and Medium Scale units. It also derives estimates of consumption of the chemicals products in the country. The data in respect of Export and Import of Chemicals and Petrochemical items is being maintained by DCPC from the data supplied by DGCIS under the Ministry of Commerce and Industry.

3. This publication consists seven chapters, namely, Chapter-1: An overview of Chemical and Petrochemical Sector; Chapter-2: Global Scenario; Chapter-3: Important Economic Indicators; Chapter-4: India Trade classification (Harmonized System) [ITC (HS)]-2017 - An Abstract; Chapter-5:

National Industrial Classification (NIC) - A Digest. Chapter-6: Indices released by Government of India; Chapter-7: Glimpses of Important Trends during 2014-15 to 2018-19.

Chapter-1 besides defining Basic Chemicals, Specialty Chemicals & Agro-chemicals, also presents the latest status of Chemical Sector in India. Chapter-2 presents the status of Indian Chemical Sector vis-a-vis other countries of the world. Chapter-3 provides important statistics like GVA, Index of Industrial production, Export and Import of Chemical sector. Chapter-6 describes important indices like Index of Industrial Production (IIP), Consumer Price Index (CPI) & Whole Sale Price Index (WPI). Chapter-7 provides graphical presentation of trends for the period 2014-15 to 2018-19 in Production, Installed Capacity, Import and Export for various groups under Major Chemical and Major Petrochemical along with brief analysis. At the end in the Appendices Section, Statistical tables presenting information inter-alia on Production, Installed Capacity, Capacity Utilization, Imports / Exports along with their growth rates during 2011-12 to 2018-19 have also been provided. Detailed table on Foreign Trade, FDI, IIP, WPI etc. related to Chemical and Petrochemical Sector have also been included in the Appendices Section.

4. The production of Selected Major Chemicals (Group-wise) and selected Major Petrochemicals (Group-wise) is generally found to be growing consistently over the years. The annual growth of production during 2018-19 over preceding year was 4.70% with CAGR of 3.02% over a period of 8 years, in case of Major Chemicals. The annual growth of Basic Major Petrochemicals was 3.82% over preceding year with CAGR of 3.54% during the same period.

5. Installed Capacity utilization in case of basic Major Chemicals was 82% in 2018-19 as against 79% in 2017-18 while it was around 87% as against 84% over the last year, in case of Basic Major Petrochemicals. The utilization of installed capacity was floated around 82% - 85% for the Alkali and Inorganic

Chemicals, whereas it was in the range of 67- 78% in case of Organic Chemicals, Pesticides (Technical Grade) and Dyes and Pigments (2018-19).

6. Among Selected Major Chemicals (Group-wise), for Inorganic Chemicals and Organic Chemicals there was a substantial import into the country. Amongst Inorganic Chemicals, two products, namely, Carbon Black (Rs.2,494/- crore) and Calcium Carbonate (Rs.869/-crore) have imports of more than Rs.3,000/- crores. (*Table 17*). Amongst Organic Chemicals, five products, namely, Acetic Acid (Rs.4,224/- crore), Acetone (Rs.521/- crore), Phenol (Rs.2,177/- crore), Methanol (Rs.5,195/- crore), Maleic Anhydride (Rs.617/- crore) and Aniline (Rs.815/- crore) have more than Rs.13,000/- crore of imports into the country (*Table 17*).

7. Amongst Selected Basic Major Petrochemicals (Group-wise) for Polymers, Synthetic Rubber and Synthetic Detergent Intermediate, there was a substantial import into the country. Amongst Polymers, three products, namely, High Density Polyethylene (Rs.8,727/-crore), Polypropylene (Rs.8,370/-crore) and Poly Vinyl Chloride (Rs.13,541/-crore) have import of more than Rs.30,000/-crore (*Table 25*). Amongst Synthetic Rubber, four products, namely, Styrene Butadiene Rubber (SBR) (Rs.1,570/-crore), Poly Butadiene Rubber (Rs.1,383/-crore), Ethyl Vinyl Acetate (Rs.2,029/-crore) and Butyl Rubber (Rs.2,002/-crore) which have import of more than Rs.6,000/-crore into the country (*Table 25*). Amongst Synthetic Detergent Intermediates, one product, namely, Linear Alkyl Benzene (Rs.2,100/-crore) has import of more than Rs.2,000/- crore in the country (*Table 25*). Amongst Selected Basic Major Petrochemicals (Group – wise), in case of Performance Plastics, major portion of domestic production is exported (about 68% of domestic production) (*Table 6*). Amongst Performance Plastics, there is one product, namely, PET chips (Polyester Chips) (Rs.8,897/-crore) has an export of more than Rs.8,000/- crore (*Table 24*).

8. The trade deficit during 2018-19 (i.e. net import) in Chemicals and Petrochemicals Sector (comprising chapters 28, 29, 32, 38, 39, 4002, 54 and 55 of HS code) was Rs.1,11,548/-crore as per figures available on DGCIS portal (as on 12.12.2019 (*Table 12 A*)). The trade deficit in respect of selected Major Chemicals and Petrochemical Products, being monitored by DCPC & which are basically intermediate in nature, was around Rs.21,228/-crore as per figures received from DGCIS, Kolkata. (*Tables 15 & 23*).

9. In respect of Major Chemicals at group level, it is observed that Alkali Chemicals, Organic Chemicals and Inorganic Chemicals were in trade deficit, whereas Pesticides (Technical Grade and formulation both); and Dyes & Pigments were trade surplus, during 2018-19 (*Table 18*). However, in respect of Major Petrochemicals at group level Polymers, Fiber Intermediates, Synthetic rubber, Synthetic Detergent Intermediates and Other Petro-based Chemicals were in trade deficit, whereas Synthetic Fibre, Performance Plastics, Aromatics and Olefins were in trade surplus during the same period (*Table 26*). This aggregates to overall trade surplus in Major Chemicals and overall trade deficit in Major Petrochemicals resulting in to net trade deficit for Chemicals and Petrochemicals sector.

## ACRONYMS

AF	Acrylic Fibre (including Dry Spun)
ASI	Annual Survey of Industries
ACN	Acrylonitrile
CAGR	Compound Annual Growth Rate
CEFIC	European Chemical Industry Council
CSO	Central Statistics Office
CPI	Consumer Price Index
DGCI&S	Directorate General of Commercial Intelligence & Statistics
DIPP	Department of Industrial Policy and Promotion
DMT	Dimethyl Terephthalate
EO	Ethylene Oxide
EPDM	Ethyl Propylene Dimers
EVA	Ethyl Vinyl Acetate
EX-PS	Expandable Polystyrene
FDI	Foreign Direct Investment
GVA	Gross Value Added
HBR	Halo Butyl Rubber
HDPE	High Density Polyethylene
IIP	Index of Industrial Production
IIR	Iso Butylene Isoprene Rubber
ISIC	International Standard Industrial Classification
ITC (HS)	Indian Trade Classification (Harmonized System)
KTPA	Thousand Tonnes Per Annum
LAB	Linear Alkyl Benzene
LDPE	Low Density Polyethylene
LLDPE	Linear Low Density Polyethylene
MEG	Mono Ethylene Glycol
MEK	Methyl Ethyl Ketone
MMA	Methyl Methacrylate

MMSCM	Million Standard Cubic Meters
MOSPI	Ministry of Statistics and Programme Implementation
MT	Metric Tonne
NBR	Nitrile Butadiene Rubber
NFY	Nylon Filament Yarn
NIC	National Industrial Clasification
NIY	Nylon Industrial Yarn
ONCB	Ortho Nitro Chloro Benzene
PAN	Phthalic Anhydride
PBR	Poly Butadiene Rubber
PBT	Polybutylene Terephthalate
PET	Polyethylene terephthalate
PIB	Polyisobutylene
PFY	Polyester Filament Yarn
PG	Propylene Glycol
PMMA	Polymethyl Methacrylate
PNCB	Para Nitro Chloro Benzene
PO	Propylene Oxide
PP	Polypropylene
PPFY	Polypropylene Filament Yarn
PPSF	Polypropylene Staple Fibre
PS	Polyestyrene
PSF	Polyester Staple Fibre
PSFF	Polyester Staple Fibrefil
PTA	Purified Terephthalic Acid
PVC	Poly Vinyl Chloride
SAN	Styrene Acrylonitrile
SBR	Styrene Butadiene Rubber
UNSC	United Nations Statistical Commission
VAM	Vinyl Acetate Monomer
WPI	Wholesale Price Index

		Styrene Acrylonitrile (SAN)	Polytetrafluoroethylene(PTFE)

		Resin	
		Polyester Chips/PET Chips	

## B. Intermediates

I.	<b>Fibre Intermediates</b>	Acrylonitrile	Caprolactum
		Mono Ethylene Glycol (MEG)	Dimethyl Terephthalate (DMT)
		Purified Terephthalic Acid (PTA)	

## II. Building Blocks

i.	<b>Olefins</b>	Ethylene	Propylene
		Butadiene	
ii.	<b>Aromatics</b>	Benzene	Toluene
		Orthoxylene	Paraxylene
		Mixed Xylene	

## C. Other Petro-based Chemicals

Diethylene Glycol	Diacetone Alcohol	Ethylene Dichloride
Butanol	Oxo Alcohol	2-Ethyl Hexanol
Vinyl Chloride Monomer	Epichlorohydrine	Iso Butylene
Metaxylene	Methyl Isobutyl Ketone	PBT
PET	PIB	Polycarbonate
Propylene Oxide	Propylene Glycol	Polyvinyl Acetate Resin
Unsaturated Polyester Resin	Methyl Methacrylate	Iso-Butanol
Ethyl Benzene	C4-Raffinate	Cellulose Acetate Butyrate
Cellulose Acetate Sheet	Cellulose Nitrate Sheet	Melamine Moulding Powder
Polyacetal Resin	Phthalic Anhydride	Styrene
Vinyl Acetate Monomer	Isopropanol	Polyol

## **DATA SOURCES & DEFINITIONS**

The major sources of data presented in this publication are:

(i) Production & Installed capacities	Production of Major Chemicals and Petrochemicals and their installed capacities have been aggregated based on monthly returns received directly by the Department of Chemicals & Petrochemicals from the manufacturers under large and medium scale.
(ii) Imports & Exports	Directorate General of Commercial Intelligence & Statistics, Ministry of Commerce & Industry, Kolkata.
(iii) FDI	Ministry of Commerce & Industry, Department of Industrial Policy & Promotion.
(iv) Index of Industrial Production	Ministry of Statistics & Programme Implementation, Central Statistics Office (CSO), New Delhi.
(v) Wholesale Price Index	Office of the Economic Adviser, Department for Promotion of Industry and Internal Trade, Ministry of Commerce & Industry, New Delhi.
(vi) Chemical Industry (Broad definition)	The Chemical industry includes organic chemicals, inorganic chemicals, pharmaceuticals products, fertilizers, tanning or dyeing extracts, dyes pigments, paints and varnishes, putty and other mastics inks, essential oils, perfumery cosmetic, soap, organic surface, active agents, washing, lubricating, artificial waxes, dental waxes, polishing, albuminoidal substance, modified starches, glues, enzymes, explosive, pyrotechnic products, beverages, spirits and vinegar, matches, pyrophoric alloys, photographic or cinematographic goods, miscellaneous chemical products, petrochemicals, plastics synthetic, rubber, man-made filaments, manmade fibre.
(vii) Chemicals and Petrochemicals (Narrow definition)	The Chemicals and Petrochemical products that are monitored by the Department of Chemicals & Petrochemicals are selected major products and the list of these products is given in the tables 3 & 8 respectively. Unless contrary is mentioned, the terms ‘Major Chemicals’ and ‘Major Petrochemicals’ refer to the products or groups thereof as enumerated in the tables 3 & 8.

## Chapter 1

### An Overview of Chemical and Petrochemical Sector

The chemical industry is the backbone of industrial and agricultural development of the country and provides building blocks for several downstream industries, such as textiles, papers, paints, soaps, detergents, pharmaceuticals, varnish etc. It is one of the most diversified of all industrial sectors covering thousands of commercial products. Petrochemicals constitute a very important segment of world chemicals market, with a share of nearly 40 per cent. The industry is important as it has several linkages with other sectors of an economy. Petrochemicals have backward linkages with other industries in petroleum refining, natural gas processing and forward linkages with industries that deal in a variety of downstream products. Also, the industry offers alternatives, which serve as substitutes for natural products and hence, has the capacity to meet the constantly growing demand that would otherwise strain the natural resources. The value additions in the petrochemicals chain offer immense possibilities and cater to the need of textiles and clothing, agriculture, packaging, infrastructure, healthcare, furniture, automobiles, information technology, power, electronics and telecommunication, irrigation, drinking water, construction needs and host of other articles of daily and specialized usage, amidst other emerging areas.

2. In Chemicals sector, 100% FDI is permissible under the automatic route, through the RBI. Manufacture of most chemical products, inter-alia, covering organic / inorganic, dyestuffs & pesticides is de-licensed. The entrepreneurs need to submit only Industries Entrepreneur Memorandum (IEM) with the Department of Industrial Policy & Promotion provided location of the project falls outside standard urban area limits of metropolitan cities and municipal cities. Only the following items are covered in the compulsory licencing list because of their hazardous nature as required by international conventions.

- Hydrocyanic acid & its derivatives
- Phosgene & its derivatives
- Isocynates & di-isocynates of hydrocarbons.

3. Chemicals can be broadly divided into the following sub-groups:-

i. **Basic Chemicals**

Chemicals, such as organic and inorganic chemicals, bulk petrochemicals, other chemical intermediates, plastic resins, synthetic rubber, man-made fibres, dyes and pigments, printing inks, are basic chemicals. These are also known as commodity chemicals.

ii. **Specialty Chemicals**

Specialty Chemicals, also known as performance chemicals, are low-volume but high-value compounds. These chemicals are derived from basic chemicals and are sold on the basis of their functions. For example, paints, adhesives, electronic chemicals, water management

chemicals, oilfield chemicals, flavours and fragrances, rubber additives, paper additives, industrial cleaners and fine chemicals, sealants, coatings, catalysts etc. come under this category.

### **iii. Pesticides**

Chemicals which essentially are meant for protecting agriculture crops against insects and pests are covered under this sub-group. Fertilizers and Pesticides played an important role in the "Green Revolution", during the 1960s and 1970s. Indian exports of agrochemicals have shown an impressive growth over the last five years. There are many pesticide formulators spread over the country and India is the 4<sup>th</sup> largest producer of agrochemicals after USA, Japan and China. This industry is net export earning & contributes significantly to the foreign exchange basket of the country.

4. Based on composition, building blocks for petrochemicals are divided into two sub-groups:-

#### **i. Olefins:**

Olefin, also called as alkenes contains one or more pairs of carbon atoms linked by a double bond. Examples include ethylene, propylene and butadiene. Both ethylene and propylene are used in the industrial production of chemicals, plastics and plastics products while butadiene is used in the industrial production of synthetic rubber.

#### **ii. Aromatics:**

Aromatics are hydrocarbons derived from petroleum, characterized by a ring-like molecular structure. Examples include benzene, toluene, and xylene. Benzene is used in making dyes as well as in making synthetic detergents. A combination of benzene and toluene are used in making isocyanates which are required in making polyurethanes while xylenes are used in the industrial production of both plastics and synthetic fibres.

### **5. Growth Drivers for the Chemical Sector:**

- A large population, huge domestic market, dependence on agriculture and strong export demand are the key growth drivers for this industry.
- A global shift towards Asia as the World's chemicals manufacturing hub.
- Per capita consumption of chemicals in India is lower, compared to western countries, so immense scope for new investments.
- Rise in GDP and purchasing power generates huge growth potential for the domestic market.
- A focus on new segments such as specialty and knowledge chemicals.
- Skilled science professionals.
- World-class engineering and strong R&D capabilities.

## **6. Research & Development (R&D)**

The Chemical sector is highly heterogeneous encompassing many segments like organic, in-organics, dyestuffs, pesticides, paints, soaps and petrochemicals etc. Research and Development is critical and of paramount importance for the growth & development of this sector. Continued R&D efforts in the part of the industry helps to improve the quality standards, obtain higher yields resulting in reduction in cost of production and to earn competitive edge in the International Market. Indian Chemical Industry spends on R&D to the extent of 2-3% of their total turnover, as against 9-10% by the multi-national companies in overseas countries. The industry would, therefore, have to make large investments in R&D to successfully counter competition from the international chemicals industry. India has a number of scientific institutions and the country's strength lies in its large pool of highly trained scientific manpower. With the introduction of the Patent Act 2005, product innovation has assumed high importance.

## **7. Foreign Technology Agreements**

Foreign Technology Agreements in India cater to the growth of the technology in the Indian industries. The foreign technology is transferred from foreign sources such as research and development agencies, foreign parent companies and other manufacturers to the Indian counterparts. The transfer of foreign technology takes place by the means of foreign direct investments and foreign technology collaboration agreements. Foreign Technology Agreements in India permit transfer of technology by the means of Government approval or through the automatic route delegated by the RBI.

8. The Chemical and Petrochemical Industries occupies a pivotal position in meeting some basic human needs and in improving the quality of life. It is extremely important to the economy and is an integral part of everyday life. India has a high population base and thus, faces formidable problems in providing sufficient food, medicines and adequate shelter. From a very modest level of 52 million MT in 1951-52, food grain production increased to about 285.21 million MT in 2018-19. The chemical industry provides the vital inputs required, chemical fertilizers and pesticides, to augment food production and save crops from attack by a variety of pests in a safe and selective way. The marked improvements in the average life expectancy of our countrymen can be at-least partially attributed to the Chemical Industry which has provided lifesaving drugs and other chemicals required for managing public health care. The problem of housing can be tackled effectively with the assistance of the Chemicals Industry. It plays a crucial role in housing development.

9. The Chemical Industry converts raw materials like water, salt, crude oil, natural gas, air, metals minerals, etc. into other valuable products. It is involved in almost every industrial process and therefore plays a significant role in economic and social development. Without Chemical Industry, there would be no electronics or microelectronics, refrigerators, recording tapes, automobiles, laser discs, super magnets, processed foods and virtually all consumer products etc. Even the power industry depends on the Chemical Industry for its operations.

The use of chemicals (ion exchange resins) becomes indispensable for removing dissolved salts needs in boilers and other applications. In gold mining, cyanide solution is used for extracting gold. The crude oil refining process uses chemicals, catalysts, heat and pressure to separate and combine the basic types of hydrocarbon molecules naturally found in crude oil into groups of similar molecules. Apart from providing a variety of drugs for alleviation of human sufferings, the chemical industry provides safe anesthetic agents and high quality artificial aids including a hip joint made from ultra-low molecular weight polyethylene. Other health products including dental fills, contact lenses and dialyses also depend on the Chemicals Industry.

10. Some of the most useful materials, synthetic polymers, also known as plastics, have transformed our lives in the last few decades. The driving force for this development was provided by the need for conservation of natural resources and energy efficiency and inherent advantages of the material which created possibilities of innovative designs and cost savings. Its usefulness, adaptability and flexibility of usage have led to a shift in manufacturing from the conventional material based products to synthetic products. The production of polymers has increased from 7.3 million tonne in 2011-12 to 10.04 million tonne in 2018-19 (CAGR of 4.76%) while its consumption has increased from 8.52 million tonne to 12.58 million tonne (CAGR of 5.73%) during the same period.

11. Chemicals from petroleum may range from basic petrochemicals such as ethylene, propylene, benzene, xylenes to finished end-products like plastics, rubbers, fibers, detergents, pesticides, dyes etc. These may be classified as (a) first generation, (b) second generation and (c) third generation petrochemicals. First generation petrochemicals are chemicals directly available from basic inputs such as petroleum crude oil or natural gas, either by fractionation, isomerization, cracking etc. These can also be derived from coal gasification and bio mass. These generally represent the basic petrochemicals, which are the building blocks for various chemical syntheses. Examples of this class of chemicals are methane, ethane, propane, ethylene, propylene, toluene, xylenes etc. Second generation petrochemicals are the derivatives of the first generation petrochemicals. Examples of such products are styrene (derived from benzene and ethylene), dimethyl terephthalate or terephthalic acid (derived from p-xylene), acrylonitrile (derived from propylene), ethylene glycol (derived from ethylene), vinyl chloride monomer (derived from acetylene or ethylene) etc. Second generation petrochemicals constitute the intermediate chemicals which serve as the raw materials for consumer industries like plastics, rubbers, fibres, dyes, detergents etc. Third Generation Petrochemicals are the consumer commodities derived generally from second generation petrochemicals and represent the most important commercial products such as plastics, rubbers, fibres, detergents etc. Examples are polystyrene (from vinyl chloride monomer), DDT from (chlorobenzene), azo dyes (from styrene), Polyvinyl chloride (from aniline) etc. However, some of the products may be directly synthesized from first generation petrochemicals. Polybutadiene rubber, for instance, is obtained by polymerizing butadiene. Since most of the plastics or rubbers are derived from second generation petrochemicals, polybutadiene rubber is regarded as a third generation petrochemical.<sup>1</sup>

12. Chemical sector is predominantly based on feedstock derived from crude oil, natural gas, salt and minerals. Naphtha (used for production of Urea, Aromatics and Olefins), Heavy

---

<sup>1</sup> Dr. G.N.Sarkar, Advanced Petrochemicals, First Edition, Khanna Publishers, New Delhi

Gas oil (propylene and ethylene) and Kerosene (Linear Alkyl Benzene) are derived from crude oil. Steam cracking/ Catalytic Reforming of low and high aromatic naphtha in oil refineries provide Olefins (Ethylene, Propylene and Butadiene) and Aromatics (benzene, toluene and xylenes). Natural gas contains Methane ( $\text{CH}_4$ ), Ethane ( $\text{C}_2\text{H}_6$ ), Propane ( $\text{C}_3\text{H}_8$ ) and Butane ( $\text{C}_4\text{H}_{10}$ ). Rich natural gas, which contains C2 and C3 in extractable quantity, is used in producing Ethylene and Propylene. Methane is converted into synthesis gas. Synthesis gas is a mixture of carbon monoxide & hydrogen which is used to make ammonia & methanol. Ammonia is used to make Urea and Methanol is used to make acetic acid and derivatives. Consumption of naphtha in petrochemical sector has increased from 9464 thousand tonne in 2013-14 to 10602 thousand tonne in 2018-19. Off take of natural gas for petrochemical sector has increased from 2405 million standard cubic meter to 3386 million standard cubic meters during the same period.

13. Olefins and Fibre Intermediates (Acrylonitrile, Caprolactum, Mono Ethylene Glycol, Purified Terephthalic Acid, Dimethyl Terephthalate) form the basis of the *petrochemical industries*. Olefins and Aromatics are used in producing Fibre Intermediates. Salt is the feed stock for the chlor-alkali chemical industry, just as crude oil and Natural Gas for the petrochemical industry. Salt, Aromatics, Minerals (Limestone, Bauxite ore (Aluminium), Rock Phosphate, Sulphur, Iron ore, Indium ore (Tin), Chromite ore, Mica, Silica, Manganese ore, etc) and Basic metals (Copper, Zinc, Titanium, Aluminium, Iron, Chromium, Tin, Nickel, etc) form the basis of *chemical industries* producing Chlor-Alkali, Organic Chemicals, Inorganic Chemicals, Pesticides and Dyes & pigments. Dyes are organic compounds and are mainly based on Benzene, Toluene, Naphthalene (from petroleum fractions and coke oven batteries of steel plants), Anthracene and Cyanuric Chloride. Pesticides are mainly based on Benzene, Naphthalene, Phosphorous (produced from phosphate rock) and Sulphur. Pharmaceuticals are mainly based on Benzene, Toluene and Xylene.

14. There are two naphtha, two gas based and seven dual feed cracker complexes in the country with a combined annual ethylene capacity of 7.27 million MT.

15. Innovations in additives, alloys, blends, compounds, composites and high grade reinforcement materials such as glass, nano-clays, carbon nano-tubes and carbon fibres require attention for technology development. New developments in the field of bio and photodegradable plastics, are also taking place all over the world. The chemical and petrochemical industries face the challenge to operate in an environmentally acceptable manner. Chemicals are globally tradable and unless chemicals produced in India are cost effective, these cannot contribute usefully to the Nation's economy. With an eye on emerging usages, research and development efforts may focus on the need to modernize and upgrade the existing manufacturing processes, improve the quality of existing products and make them safe for environment and human health.

16. According to the National Sample Survey Office (NSSO)'s latest survey (July 2015-June 2016 NSS 73<sup>rd</sup> round), 3.72 lakh persons were engaged in Unincorporated Chemicals and Chemical Products Sector (Industry Division 20) while 3.6 crore persons engaged in Unincorporated Manufacturing sector. There is around 1.73 lakh Unincorporated Enterprises in Chemicals and Chemical Products Sector (Industry Division 20) industries while 1.97 crore Unincorporated Enterprises in Manufacturing sector.

## Chapter 2

### Global Scenario

As per the European Chemical Industry Council Report-2020 (Cefic- 2020) world chemicals (excluding pharmaceuticals) sales in 2018 are valued at 3347 Euro billion. India ranks 4th in Asia and 6th in world with chemicals sales valued at 89 Euro billion in 2018. India's Capital spending in World Chemicals (excluding pharmaceuticals) is valued at 4.6 Euro billion in 2018, as compared to 3.6 Euro billion in 2008. India's chemical R&D spending is valued at 1.4 Euro billion in 2018, as compared to 0.7 Euro billion in 2008. Top ten countries in World Chemical sales during 2018 are as under:

<b>Rank</b>	<b>Country</b>	<b>Sales in 2018 (in Euro Billion)</b>
1	China	1198
2	European Union (EU)	565
3	USA	468
4	Japan	180
5	South Korea	127
6	India	89
7	Taiwan	76
8	Russia	76
9	Brazil	69
10.	Saudi Arabia	53

*Source: cefic report 2020*

2. As per UN Comtrade Database for 2018, India ranks 14<sup>th</sup> in the world exports of chemicals (excluding pharmaceutical products) and ranks 6<sup>th</sup> in the world imports of chemicals (excluding pharmaceutical products). India's exports of chemicals (excluding pharmaceutical products) was 39.75 US\$ billion in 2018. India's share in World exports of chemicals (excluding pharmaceutical products) was 2.37% in 2018. India's imports of chemicals (excluding pharmaceutical products) was 62.08 US\$ billion in 2018. India's share in World imports of chemicals (excluding pharmaceutical products) was 3.65% in 2018.

3. The top five Chemical Products (in terms of value) exported to different countries during 2018-19 were Other Herbicides-Anti Sprouting Products (Rs.4,042/-Cr.), Other Insecticides (Rs.3,035/-Cr.), Reactive Dyes (Rs.2,616/-Cr.), Menthol (Rs.2,152/- Cr.) and

Pigment Emulsion (Rs.1,871/-Cr.). Other Herbicides-Anti Sprouting Products were exported mainly to the countries of USA, Brazil, France, Argentina & Israel; Other insecticides products exported to Brazil, USA, Bangladesh, Iran & Mexico; Reactive Dyes exported to Bangladesh, Turkey, Pakistan, Singapore & Honduras and Menthol exported to China, USA, Singapore, Japan & France and Pigment Emulsion exported to USA, Netherlands, China, Japan and Korea.

During 2018-19, top five Chemical products (in terms of value) imported from different countries were Methanol (Rs.5,005/-Cr.), Acetic Acid (Rs.3,968/-Cr.), Carbon Black (Rs.1,923/- Cr.), Phenol (Rs.1,897/- Cr.) and Other Insecticides (Rs.1,789/- Cr.). Methanol mainly imported from Iran, Saudi Arab, Qatar, UAE and USA. Acetic Acid imported from Singapore, China, Malaysia, USA and Saudi Arab. Carbon Black imported from China, Korea, Russia, Egypt and UAE. Phenol imported from Thailand, USA, Saudi Arab, Korea RP and South Africa and Other Insecticides imported from China, USA, Taiwan, Israel and Korea.

Export of top five Petrochemical Products (in terms of value) to different countries during 2018-19 were Paraxylene (Rs.18,083/- Cr), Benzene (Rs.6,243/- Cr.), Polyester Filament Yarn (Rs.4,874/- Cr.), Polyester Chips/Pet Chips (Rs.3,539/- Cr) and Polypropylene (Inc. Co-Polymer) (Rs.3,503/- Cr.). Paraxylene was mainly exported to China, Malaysia, Indonesia, Pakistan and Thailand. Benzene was exported to Saudi Arab, China, USA, Spain & Belgium; Polyester was exported to Brazil, Turkey, Bangladesh, Egypt and Korea. Polyester Chips/Pet Chips was exported to Italy, UAE, Japan, Bangladesh & Egypt and Poly Propylene is exported to China, Turkey, Pakistan, Italy and Vietnam.

Top five Petrochemical products (in terms of value) imported from different countries during 2018-19 were Poly vinyl Chloride (Rs.9,295/- Cr.), Styrene (Rs.6,824/- Cr.), High Density Polyethylene (Rs.6,516/-Cr.), Poly Propylene (Inc. Co-Polymer) (Rs.6,405/- Cr.) and Paraxylene (Rs.6,405/-Cr.). Poly vinyl Chloride mainly imported from Korea, Taiwan, Japan, China and USA. Styrene imported from Singapore, Kuwait, Saudi Arab, Korea & USA. High Density Polyethylene imported from UAE, Singapore, Qatar, Saudi Arab & USA. Poly Propylene (Inc. Co-Polymer) imported from UAE, Singapore, Saudi Arab, Thailand & Korea. and Para Xylene imported from Japan, Singapore, Kuwait, Saudi Arab & Korea RP.

## Chapter 3

### Important Economic Indicators

According to the National Accounts Statistics 2019, brought out by the Central Statistics Office (CSO), Chemical and Chemical products sector, excluding pharmaceuticals (Industry Division 20 of NIC 2008), accounted for 1.49% of the GVA for All Economic Activity in 2017-18. The share of Gross Value Added (GVA) in the Manufacturing Sector during 2017-18 is about 9.06%. GVA of Chemical Sector has grown with CAGR of 12.47% during the period 2012-13 to 2017-18. The average Indices of Industrial Production (IIP) for the Chemical and Chemical products (Industry Division 20 of NIC 2008) for the year 2018-19 stood at 119.0, which is 2.5% higher as compared to the previous year. The size of the Indian Chemical industry, excluding Pharmaceuticals (Industry Division 20 of NIC 2008), in terms of Value of Output in the year 2017-18 was Rs.7,47,737/- crores and it is 7.5% of Value of Output of Manufacturing Sector. The size of Chemical industry, including Pharmaceuticals (i.e. Industry Division 20 and 21 of NIC 2008), in terms of Value of Output in the year 2017-18 was Rs.11,17,622/- crores and it is 11.20% of the Total Value of Output of Manufacturing sector. As per the data of six years, i.e. between 2012-13 to 2017-18, real growth rate in Output of Chemical Industry excluding Pharmaceuticals Industry (i.e. Industry Division 20) is 7.7% while it is 9.1% for Chemical Industry including Pharmaceutical Industry {i.e. Industry Division 20 &21}. Growth in Value of Output for Manufacturing Sector during the same period is 6.8%.

2. The exports and imports data of 2018-19 shows that in the Chemical Sector, comprising of chapters 28, 29, 30, 31, 32, 38, 39, 4002, 54 and 55 of HS code, India was net importer in all categories except of four categories, namely, Pharmaceuticals Products (Chapter 30 HS code), Man-made staple fibers (Chapter 55 HS code), Man-Made Filaments (Chapter 54 HS code) and Tanning or Dyeing (Chapter 32 HS code). Pharmaceuticals products accounted Rs.88,659/- crore, Man-made staple fibres accounted Rs.6,800/- crore, Man-Made Filaments accounted Rs.9,175/- crore and Tanning or Dyeing accounted Rs.7,664/- crore in ***net exports*** while Fertilizers (chapter 31 HS code) accounted Rs.45,419/- crore, Plastic and Articles thereof (Chapter 39 HS code) accounted Rs.50,512/- crore, Organic Chemicals (Chapter 29 HS code) accounted Rs.28,985/- crore, Inorganic Chemicals (Chapter 28 HS code) accounted Rs.39,181/- crore, Miscellaneous Chemical Products (Chapter 38 HS

code) accounted Rs.9,352/- crore and Synthetic Rubber and Factice (4002 HS code) accounted Rs.7,157/- crores in the *net imports* during 2018-19. {**Table No. 12A**}

3. As per Annual Survey of Industries (Factory Sector), 2016-17, top seven States, namely, Gujarat (31.1%), Maharashtra (16.8%), Uttarakhand (5.9%), Tamil Nadu (4.7%), Himachal Pradesh (4.3%), West Bengal (4.3%) and Uttar Pradesh (3.8%), contributed around 71% in the Gross Value Added (GVA) for the Chemical & Chemical products Sector (Industry Division 20 of NIC 2008) and seven States, namely, Gujarat (33.2%), Maharashtra (16.4%), Tamil Nadu (5.0%), West Bengal (5.0%), Uttar Pradesh (4.9%), Rajasthan (4.8%) and Andhra Pradesh (3.7%), contributed around 73% in the Value of Output. {**Table 50**}

4. The exports of chemicals & petrochemicals (excluding pharmaceutical products and fertilizers) has increased from Rs.1,35,330/- crores in 2011-12 to Rs.2,83,287/-crore in 2018-19. The percentage share of the exports of chemicals & petrochemicals (excluding pharmaceutical products and fertilizers) in the total national exports increased from 9.2% to 12.3% during the same period {**Table 11, 16 & 24**}.

At the product level, the following products accounted more than Rupees One Thousand crore in the exports during 2018-19:

<b>Product</b>	<b>Export (Rs. crore)</b>	<b>Product</b>	<b>Export (Rs. crore)</b>
Paraxylene	19253	Other Pesticides	2333
Polyester Chips/Pet Chips	8897	Azo Dyes	2252
Polyester Filament Yarn	8396	Polyester Staple Fibre	2250
Benzene	8221	Mono Ethylene Glycol	1753
Polypropylene (Inc. Co-Polymer)	5966	Ethylene	1407
Other Herbicides-Anti Sprouting Products	5951	Low Density Polyethylene	1328
Other Insecticides	5803	Ortho-Xylene	1227
Reactive Dyes	5114	Butadiene	1139
Pigment Emulsion	4946	Cypermethrin	1124
Other Fungicide Nes	4135	Disperse Dyes	1076

Linear Low Density Polyethylene	3808	Food Colours	1073
High Density Polyethylene	3652	Carbon Black	1036
Menthol	2532		

5. The imports of Chemicals & Petrochemicals (excluding Pharmaceutical products and fertilizers) has increased from Rs.1,76,419/- crores in 2011-12 to Rs.3,94,834/- crores in 2018-19. The percentage share of the imports of Chemicals & Petrochemicals (excluding Pharmaceutical products and fertilizers) in the total national imports increased from 7.5% to 11.0% during the same period {**Table 11, 17 & 25**}.

At the product level, the following products accounted for more than Rupees One Thousand crores in the imports in 2018-19:

Product	Import (Rs. crore)	Product	Import (Rs. crore)
Poly Vinyl Chloride	13541	Linear Low Density Polyethylene	2287
High Density Polyethylene	8727	Phenol	2177
Polypropylene (Inc. Co-Polymer)	8370	Linear Alkyl Benzene	2100
Styrene	7441	Ethyl Vinyl Acetate	2029
Paraxylene	6460	Butyl Rubber	2002
Methanol	5195	Polyester Chips/Pet Chips	1991
Nylon-6	4303	Abs Resin	1736
Acetic Acid	4224	Other Pesticides	1638
Mono Ethylene Glycol	3716	Styrene Butadiene Rubber	1570
Polycarbonate	3693	Soda Ash	1449
Polyol	3507	Ethylene Dichloride	1414
Purified Terephthalic Acid	3408	Poly Butadiene Rubber	1383
Low Density Polyethylene	3104	Vinyl Acetate Monomer	1359
Vinyl Chloride Monomer	2529	Other Herbicides-Anti Sprouting Products	1222
Carbon Black	2494	Polyester Filament Yarn	1180

Acrylonitrile	2440	Phthalic Anhydride	1075
Other Insecticides	2400	Elastomeric/Spandex Filament Yarn Yarn	1002
Toluene	2355		

6. The net imports of Chemicals & Petrochemicals (excluding Pharmaceutical products and fertilizers) has increased from Rs.41,089/-crores in 2011-12 to Rs.1,11,548/-crore in 2018-19. The percentage share of the net imports of Chemicals & Petrochemicals (excluding Pharmaceutical products and fertilizers) in the total national net imports increased from 4.7% to 8.7% during the same period. At the product level, the following products accounted more than Rs. thousand crore in the net imports in 2018-19. {**Table 12(a), 18 & 26**}

Product	Net Import (Rs. crore)	Product	Net Import (Rs. crore)
Poly Vinyl Chloride	13523	Linear Alkyl Benzene	2096
Styrene	7374	Phenol	2060
Methanol	5157	Ethyl Vinyl Acetate	2016
High Density Polythylene	5075	Butyl Rubber	1989
Acetic Acid	4119	Mono Ethylene Glycol	1963
Nylon-6	3913	Low Density Polyethylene	1777
Polycarbonate	3647	Abs Resin	1730
Polyol	3075	Carbon Black	1457
Vinyl Chloride Monomer	2529	Ethylene Dichloride	1370
Purified Terephthalic Acid	2434	Soda Ash	1297
Acrylonitrile	2410	Vinyl Acetate Monomer	1292
Polypropylene (Inc. Co-Polymer)	2404	Poly Butadiene Rubber	1230
Toluene	2260	Styrene Butadiene Rubber	1134

The following products accounted more than Rupees One Thousand crore in the total net exports in 2018-19: -

<b>Product</b>	<b>Net Export (Rs. crore)</b>	<b>Product</b>	<b>Net Export (Rs. crore)</b>
Paraxylene	12793	Menthol	2405
Benzene	8092	Azo Dyes	2210
Polyester Filament Yarn	7215	Linear Low Density Polyethylene	1521
Polyester Chips/Pet Chips	6906	Polyester Staple Fibre	1354
Reactive Dyes	4850	Butadiene	1125
Other Herbicides-Anti Sprouting Products	4729	Cypermethrin	1123
Pigment Emulsion	4373	Ortho-Xylene	1073
Other Insecticides	3402	Food Colours	1006
Other Fungicide Nes	3161		

7. Chemical Sector (including Pharmaceutical) in India is mainly in the Organised Sector {i.e. 99.5% GVA of Chemical Sector (including Pharmaceutical) comes from the organized Sector. The estimates of the Total Output (Factory Sector) of at 4-digit Industry class in the Chemicals and Chemical Products (Division 20-NIC 2008) during the year 2015-16 and 2016-17 are given in the table below:

<b>Class</b>	<b>Description</b>	<b>Total Output (Rs. Crore)</b>	
		<b>2015-16</b>	<b>2016-17</b>
2011	Manufacture of basic chemicals	126784	126624
2012	Manufacture of fertilizers and nitrogen compounds	124352	107653
2013	Manufacture of plastics and synthetic rubber in primary forms	101482	100540
2021	Manufacture of pesticides and other agrochemical products	44970	47503
2022	Manufacture of paints, varnishes and similar coatings, printing ink and mastics	42338	41880

2023	Manufacture of soap and detergents, cleaning and polishing preparations, perfumes and toilet preparations	85910	75071
2029	Manufacture of other chemical products n.e.c.	67363	64239
2030	Manufacture of man-made fibres	16017	19498
	<b>Total</b>	<b>609216</b>	<b>583008</b>

## Chapter 4

### **INDIAN TRADE CLASSIFICATION (HARMONISED SYSTEM)**

#### **[ITC (HS)] 2017- An abstract**

Indian Trade Classification (Harmonized System), 2017 has been compiled and notified by the Directorate General of Foreign Trade, Ministry of Commerce and Industry, Government of India in January 2017. ITC-HS codes are divided into two schedules. ITC (HS) Import Schedule I describe the rules and guidelines related to import policies whereas Schedule II describes the rules and regulation related to export policies. Schedule I of the ITC-HS code is divided into 21 sections and each section is further divided into chapters. The total number of chapters in the schedule I is 98. The chapters are further divided into sub-heading under which different HS codes are mentioned. Export Policy Schedule II of the ITC-HS code contains 97 chapters giving all the details about the guidelines related to the export policies.

The Chapters dealing with Chemicals and Petrochemical products are falling under Section VI, VII & XI as depicted below:

<b>Chapter</b>	<b>Description</b>	<b>Section</b>
Chapter 28	Inorganic chemicals; organic or inorganic compounds of precious metals, of rare-earth metals, of radioactive elements or of isotopes	SECTION VI
Chapter 29	Organic chemicals	
Chapter 38	Miscellaneous chemical products	
Chapter 39	Plastics and articles thereof	SECTION VII.
Chapter 40	Rubber and articles thereof	
EXIM Code 4002	Synthetic rubber and factice derived from oils, in primary Forms or in plates, sheets or strip; mixtures of any product of heading 4001 with any product of this heading, in primary forms  or in plates, sheets or strip	SECTION VII.
Chapter 54	Man-made filaments	

Chapter 55	Man-made staple fibres	SECTION XI.
------------	------------------------	-------------

Chapter	Exim Code	Item Description
28		Inorganic chemicals; organic or inorganic compounds of precious metals, of rare-earth metals, of radioactive elements or of; isotopes
	2801	FLUORINE, CHLORINE, BROMINE AND IODINE
	28011000	Chlorine
39		Plastics and articles thereof
	3902	POLYMERS OF PROPYLENE OR OF OTHER OLEFINS, IN PRIMARY FORMS
	39021000	Polypropylene

**Illustration of 8 digits Product Code:**

## Chapter 5

### **National Industrial Classification (NIC) - A Digest**

The Central Statistics Office under the Ministry of Statistics & Programme Implementation being nodal Statistical Authority in the Country is vested with the responsibility of setting up Standards for collection, compilation and dissemination of Statistical data. The Official statistics is required to be collected and presented according to classification designed to facilitate its use for National Economic Policies and conform to International comparison. The need for comparability of Statistics available from various sources, on different aspects of the economy and usability of such data for economic analysis necessitated the need of standardization of a system of classification.

CSO being responsible for coordination of statistical activities in the country and with a view to evolve and maintain statistical standards initiated task of bringing out Standard Industrial Classification as early as in 1960 and evolved a Standard Industrial Classification (SIC) in 1962. To take care of emerging changes in Organizations and Structure of Industries, the need for revision of this document was felt from time to time. With this objective, the CSO revised SIC 1962 in 1970 (NIC-70), NIC-1970 in 1987 (NIC-87) and NIC-87 in 1998 (NIC-98). It is during 1998 that 4-digit system of International Standard Industrial Classification (ISIC- 3) was followed and these 4 digits were extended up to 5 digits based on national needs. Consequent upon release of United Nations International Standard Industrial Classification (ISIC) – 2002 Rev. 3.1, NIC- 1998 was updated to bring out NIC – 2004. After adoption of ISIC Revision-4 by the United Nations Statistical Commission (UNSC) in the year 2008, an expert committee under the chairmanship of DG, CSO deliberated on the issues and approved the draft NIC -2008 incorporating revision in NIC- 2004 consistent with ISIC revision 4.

#### **Basic features of NIC 2008**

All the activities are grouped into several “activity groups” or “tabulation categories” in a hierarchical manner. Activities are first grouped into ‘section’ alphabetically coded from A through U, every section is divided into ‘division’ with 2-digit numeric code, every division into ‘group’ with 3-digit numeric code, every group into ‘class’ with 4-digit numeric code and every 4-digit class into 5-digit ‘sub-class’. The structure is illustrated below.

Level		Description
Section		Manufacturing
Division 20		Manufacture of Chemicals and Chemical Products
Group	201	Manufacture of Basic Chemicals, Fertilizer and Nitrogen Compounds, Plastics and Synthetic Rubber in Primary Forms
	203	Manufacture of man-made fibres

Class	2011	Manufacture of Basic Chemicals
	2030	Manufacture of man-made fibres
Sub-Class	20111	Manufacture of liquefied or compressed inorganic industrial or medical gases (elemental gases, liquid or compressed air, refrigerant gases, mixed industrial gases etc.)
	20301	Manufacture of synthetic or artificial filament tow

The structure of NIC-2008 is identical to the structure of ISIC Revision up to 4-digit level ‘class’. Classes were then divided into 5-digit ‘sub classes’ according to national requirements.

## **Salient features of NIC-2008**

- The sections A to Q of NIC-2004 have been replaced by sections A to U in respect of NIC-2008. NIC-2008 has 21 sections, 88 divisions, 238 groups, 403 classes and 1304 sub-classes.
- NIC-2008 is comparable with ISIC Rev.4 till 4-digit classes in totality.
- The concept of shadow classes introduced in NIC-2004 has been done away with in NIC- 2008 as the emphasis has been given on activity rather than type of operation and scale of operation.
- In NIC-2008 some of the 5-digit sub-classes of NIC-2004 have been made separate 4-digit classes e.g. ‘Growing of Sugarcane (01115)’, ‘Growing of tobacco (01114)’, ‘Growing of fibre crops (01113)’ ‘Growing of flowers (01122)’.
- Repair and installation of machinery and equipment has been classified as separate division (Division-33) in NIC-2008.
- Repair of Personal Household goods (5260 of NIC-2004) has been removed from Section-G (wholesale and retail trade; repair of motor vehicles and motor cycles) and now included in Section-S (other service activities).
- Publishing activity which was included in division-22 of manufacturing section in NIC- 2004 is now included in division-58 (publishing activities) of NIC-2008 under Section-J (information and communication).
- Activity ‘water supply’ under division-41 (Electricity, Gas and Water Supply) of NIC- 2004 is now included in Section-E (water supply; sewerage, waste management and remediation activities).
- Explanatory notes of ISIC Rev.4 at 1/2/3-digit level have been incorporated in NIC-2008 as Annexure for better understanding of the revised classification.
- Under 4-digit classes of NIC-2008, inclusion and exclusion statements have been included in the detailed structure itself to remove ambiguity in the scope of classification and to facilitate the classification of economic activity distinctly.

Division 20 and 21 of NIC -2008 relates to “Chemical and Chemical Products” and “Pharmaceutical, Medicinal and botanical products” respectively.

# Chapter 6

## Indices released by Government of India

Indices are important economic indicators to demonstrate the relative change in the parameters over a specified period of time. Some of the important indices compiled and released by different Departments under the Government of India along with their inception and uses in different sectors of economy are summarized below:

- A. Index of Industrial Production (IIP)
- B. Consumer Price Index (CPI)- Industrial Worker, Agricultural Labourer / Rural Labourer, Rural / Urban / Combined
- C. Wholesale Price Index (WPI)

### **A. Index of Industrial Production-(IIP)**

1. The Central Statistics Office (CSO), Ministry of Statistics and Programme Implementation Compiles and brings out an index of Industrial Production. CSO revises the base year of the macroeconomic indicators, as a regular exercise, to capture structural changes in the economy and improve the quality and representativeness of the indices. In this direction, the base year of the all-India Index of Industrial Production (IIP) has also been revised from 2004-05 to 2011-12 to not only reflect the changes in the industrial sector but to also align it with the base year of other macroeconomic indicators like the Gross Domestic Product (GDP), Wholesale Price Index (WPI).
2. IIP in the revised series will continue to represent the Mining, Manufacturing and Electricity sectors. The revised series uses the National Industrial Classification (NIC) 2008 for the purpose of classification of industrial production. 15 source agencies are proving production data for Index of Industrial Production (IIP) base year 2011-12.

#### **Summary of Source Agencies of IIP in the new series with base 2011-12**

SI No	Source	Weights (%)
1	Department of Industrial Policy and Promotion (DIPP)	47.54
2	Indian Bureau of Mines	14.37
3	Ministry of Petroleum & Natural Gas	11.29
4	Joint Plant Committee	10.52
5	Central Electricity Authority	7.99
6	Department of Chemicals and Petrochemicals	2.54
7	Office of Textile Commissioner	1.94
8	Department of Fertilisers	1.06
9	Directorate Of Sugar and Vegetable Oils (for Edible Oils only)	0.97
10	Directorate Of Sugar and Vegetable Oils (for Sugar only)	0.76
11	Office of Coal Controller	0.49
12	Tea Board	0.29
13	Railway Board	0.13
14	Office of Jute Commissioner	0.07

15	Coffee Board	0.04
	GENERAL	100.00

3. Highlights of the changes in New Series of Index of Industrial Production are summarized below:

- a. The selection of items in the new series has been done at the 3 digit level of NIC for better representation as compared to selection at 2 digit level done in 2004-05 series.
- b. At the broad level, the new series has a total of 809 items occurring in the manufacturing sector in the item basket (405 item groups), where 149 new items like Steroids and hormonal preparations, Cement clinkers, Medical/ surgical accessories, Pre-fabricated concrete blocks, refined Palm Oil have been added and 124 items such as Biaxially Oriented Polypropylene (BOPP) Films, Calculators, Colour TV picture tubes, Gutka have been deleted from the 2004-05 series which had 620 items(397 item groups)in the manufacturing sector. The sectoral composition of the IIP is as follows:

Sector	Base year 2011-12		Base year 2004-05	
	Weights (%)	Item groups	Weights (%)	Item groups
Mining	14.373	1	14.157	1
Manufacturing	77.633	405	75.527	397
Electricity	7.994	1	10.316	1
<b>Total</b>	<b>100</b>	<b>407</b>	<b>100</b>	<b>399</b>

- c. To reflect the increasing significance of electricity generation from renewable sources, it has been decided to include data on electricity generation figures from these sources in the new series. This inclusion is being done from April, 2014 onwards as monthly data for electricity generation from renewable sources for earlier months were not available.
- d. For capital goods, data in the new series will now be captured in terms of ‘work in progress’ to better represent the growth of capital goods and to avoid reporting of production figures in bulk after the completion of production. Details on this methodology are available in the Report of the Working Group set up for the revision of base year, which may be accessed in the official website of this Ministry.
- e. The number of source agencies reporting data for compilation of IIP in the new series will be 14 as compared to 15 in the current series. This is on account of the fact that data on ‘Iodised Salt’ in the new series will be provided by the

Department of Industrial Policy and Promotion (DIPP) as O/o Salt Commissioner is not in a position to supply Salt production data after abolition of Salt Cess Act, 1953 in Finance Bill 2016.

- f. In the Mining Sector the coverage has undergone a change on account of the MCDR Amendment Rules, 2016 resulting in 27 non-metallic minerals being designated as minor minerals and which are no longer monitored by Indian Bureau of Mines.

## ***B. Consumer Price Index (CPI)***

1. A Consumer Price Index (CPI) is designed to measure the changes over time in general level of retail prices of selected goods and services that households purchase for the purpose of consumption. Such changes affect the real purchasing power of consumer's income and their welfare. CPI numbers are widely used as macroeconomic indicator of inflation, and also as a tool by government and central banks for targeting inflation and monitoring price stability. CPI is also used as deflators in the National Accounts. Therefore, CPI is considered as one of the most important economic indicators.
2. Different types of CPIs, namely, CPI (IW), CPI (AL/RL), CPI (UNME) and CPI (R/U/C) compiled by different agencies of Govt. of India, are available for users in our country. First three indices, including CPI (UNME), are specific to population segments. The price collection for CPI (UNME) was discontinued with effect from April 2008 and linked all India CPI (UNME) numbers were brought out from April 2008 to December 2010. The fourth one i.e. CPI (R/U/C) is for general population, sector-wise, to be explained in subsequent paragraphs.

### **3. Salient features of different types of CPIs:**

#### ***Consumer Price Index for Industrial Workers - CPI (IW)***

This index is compiled by the Labour Bureau, Ministry of Labour and Employment. The target population is working class family, defined as a family: (i) located within the center for industrial worker, (ii) has at least one member working as manual worker in an establishment in any of the seven sectors of employment covered viz., factories, plantations, mining, ports and docks, public motor transport undertakings, electricity generating and distributing establishments, and railways; and (iii) derived 50 per cent or more of its income during the calendar month preceding the day of enquiry through any manual work.

The present series of CPI (IW) is on base 2001=100. The weighting diagrams for the purpose of compilation of index numbers had been derived on the basis of average monthly family expenditure of the working class obtained from the Working Class Family Income Expenditure Survey conducted during 1999-2000.

The CPI (IW) is released every month (on the last working day of the following month) for each of the selected 78 centers as well at all India level. It is mainly used for the determination of Dearness Allowance (DA) being paid to Central/State Government employees and also to the workers in the industrial sectors, besides fixation and revision of minimum wages in scheduled employments. It is also used in moving the base year poverty lines for urban areas to the subsequent years.

*\*The base of the index is being revised to 2015=100 to replace the existing base of the index.*

### **Consumer Price Index for Agricultural /Rural Labourers - CPI (AL/RL)**

These indices are compiled by the Labour Bureau, Ministry of Labour and Employment. The target populations are agricultural and rural labourers. A rural labour household is defined as one, which derives major income from manual employment (rural labour) during the last 365 days. From amongst the rural labour households, those households, which earn 50% or more of their total income from gainful employment as manual labour in agriculture during the last 365 days, are categorized as agricultural labour households. Agricultural labour households form a major subset of rural labour households. A person is considered engaged in agricultural labour if he/she follows one or more of the agricultural occupations in the capacity of wage paid manual labourer, whether paid in cash or kind (excluding exchange labour) or both. A person who does manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) is a wage paid manual labourer. Persons who are self-employed doing manual work are not treated as wage paid manual labourers. People living in rural areas and engaged in manual labour by working in agricultural and/or non-agricultural occupations in return for wages paid either in cash or kind (excluding exchange labour) or both, are considered as rural labourers. Thus, rural labourers include both agricultural and other labourers.

The present series of CPI (AL/RL) is on base 1986-87=100. Estimates of average consumer expenditure per household generated from the results of the NSS 38th round (1983), CES formed the source of weights for different items of goods and services, used in compilation of CPI (AL) and CPI (RL).

For both the current series of CPI (AL) and CPI (RL), the retail prices in respect of goods and services are collected on monthly basis, from fixed markets in 600 sample villages in 20 states by the field workers of the Field Operations Division (FOD) of the National Sample Survey Office (NSSO). The various items (12) of goods and services are categorized into four main groups namely, (i) Food, (ii) Fuel and Light, (iii) Clothing, Bedding and Footwear; and (iv) Miscellaneous. The items of goods and services are common for the state as a whole but the varieties of most of the items differ from village to village. The

collection of retail prices is staggered over four weeks of a month with one-fourth of the sample covered every week.

The CPI (AL/RL) is released every month (20th or preceding working day of the following month) for each of the selected states as well at all India level. It is mainly used for the determination/ fixation and revision of minimum wages in agricultural sector. CPI (AL) is also used in moving the base year poverty lines for rural areas to the subsequent years.

### **Consumer Price Index for Rural, Urban and Combined - CPI (R/U/C)**

The indices are compiled by the CSO on base 2010 = 100. The consumption patterns (weighting diagrams) for this series of CPI have been derived on the basis of average monthly consumer expenditure of an urban/rural household obtained from the results of the 61st Round of CES conducted by the National Sample Survey Office during 2004-05.

### **C. Wholesale Price Index (WPI)**

WPI is an important measure to monitor the dynamic movement of prices at the wholesale level. In a dynamic world, prices keep on changing. WPI is used as a deflator of various nominal macroeconomic variables including Gross Domestic Product (GDP). The WPI based inflation estimates also serve as an important determinant, in formulation of trade, fiscal and other economic policies by the Government. WPI is also used for the purpose of escalation clauses in the supply of raw materials, machinery and construction work. Business firms in search of effective methods for coping with changes in prices often employ price adjustment (escalation) clauses in long-term sales and purchase contracts. WPI is widely recognized among business people, economists, statisticians, and accountants as a useful objective indexing tool in price adjustment clauses.

The base year of All-India WPI has been revised from 2004-05 to 2011-12 by the Office of Economic Advisor (OEA), Department of Industrial Policy and Promotion, Ministry of Commerce and Industry to align it with the base year of other macroeconomic indicators like the Gross Domestic Product (GDP) and Index of Industrial Production (IIP). The Wholesale Price Index (WPI) series in India has undergone six revisions in 1952-53, 1961-62, 1970-71, 1981-82, 1993-94 and 2004-05 so far. The current series is the seventh revision.

### **New Features of WPI**

- In the new series of WPI, prices used for compilation do not include indirect taxes in order to remove impact of fiscal policy. This is in consonance with international practices and will make the new WPI conceptually closer to 'Producer Price Index'.

- A new “WPI Food Index” will be compiled to capture the rate of inflation in food items.
- Seasonality of fruits and vegetables has been updated to account for more months as these are now available for longer duration.
- Item level aggregates for new WPI are compiled using Geometric Mean (GM) following international best practice and as is currently used for compilation of All India CPI.
- A high level Technical Review Committee has been set up for the first time to carry out dynamic review process in order to keep pace with the changing structure of the economy.

## **Chapter 7**

### **Glimpses of Important Trends during 2014-15 to 2018-19**

This Chapter has been included in this publication to highlight important trends of the sector during the last five years i.e. 2014-15 to 2018-19, through graphical presentation with brief analysis. The graphical presentation containing tables alongside displays trend during the said period in respect of Production, Installed Capacity, Export, Import and Net Export / Net Import relating to various groups under Major Chemicals and Major Petrochemicals along with compound annual growth rate (CAGR) during the period from 2014-15 to 2018-19. The Chapter also contains Pie Charts depicting share of Major groups under Major Chemicals and Major Petrochemicals in respect of Production, Installed Capacity, Export and Import along with Net Import / Net Export during 2018-19.

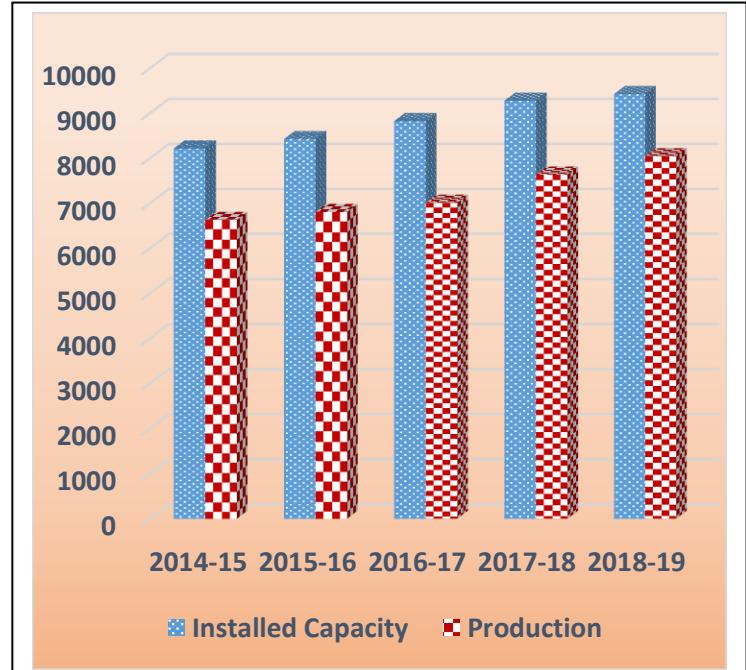

2. This Publication contains detailed tables in Appendices Section showing group-wise, product-wise, year-wise information pertaining to Selected Major Chemicals and Petrochemicals along with top five import and export destinations. The information relating to exchange rates of Indian rupees' vis-a-vis US\$, World export of Chemicals by top ten countries -2018, Sector –wise FDI Inflows etc. are also included in the Appendices Section.
3. Many of statistical tables appended in the Publication present temporal data for the period 2011-12 to 2018-19. CAGR in these tables has also been reflected over the period of 8 years.

( \$ ) : Includes capacity of all the units producing PFY, NYF, NIY and PPFY under broadbanding as Synthetic Filament Yarn :

\* Nylon 6, 66 includes installed capacity of PBT and Polycarbonate.

( \$\$ ) : Independent capacity of units producing only NYF, NIY and PPFY.

As the capacities of these products are also included in Synthetic Filament yarn, capacity utilisation can not be worked out.

( \$\$\$ ) : Combined capacity to produce both LLDPE and HDPE and hence capacity utilisation can not be worked out. However production is independent.

( \*\* ) : Combined capacity of 2-EH, Butanol & Iso Butanol is given under 2 - EH)

## **Foreign Direct Investment (FDI)**

**Table 33:- Sectors Attracting Highest FDI Equity Inflows during 2017-18 to 2019-20 (March, 20)**

Ranks	Sector	Amount in Rs. crores (US\$ in million)	
		2017-18 (April – March)	2018-19 (April – March)
1.	SERVICES SECTOR **	43,249 (6,709)	63,909 (9,158)
2.	COMPUTER SOFTWARE & HARDWARE	39,670 (6,153)	45,297 (6,415)
3.	TELECOMMUNICATIONS	39,748 (6,212)	18,337 (2,668)
4.	TRADING	28,078 (4,348)	30,963 (4,462)
5.	CONSTRUCTION DEVELOPMENT: Townships, housing, built-up infrastructure and construction-development projects	3,472 (540)	1,503 (213)
6.	AUTOMOBILE INDUSTRY	13,461 (2,090)	18,309 (2,623)
7.	CHEMICALS (OTHER THAN FERTILIZERS)	8,425 (1,308)	13,685 (1,981)
8.	CONSTRUCTION (INFRASTRUCTURE) ACTIVITIES	17,571 (2,730)	15,927 (2,258)
9.	DRUGS & PHARMACEUTICALS	6,502 (1,010)	1,842 (266)
10	HOTEL & TOURISM	7,279 (1,132)	7,590 (1,076)

Note: (i) \*\* Services sector includes Financial, Banking, Insurance, Non-Financial / Business, Outsourcing, R&D, Courier, Tech. Testing and Analysis

(ii) FDI Sectoral data has been revaluated / reconciled in line with the RBI, which reflects minor changes in the FDI figures (increase/decrease) as compared to the earlier published sectoral data.

	Petrochemicals Industry	MMSCM	2405	2890	3733	4170	4024	3386
Fuel Oil (Furnace oil+LSHS)	Chemicals & allied	K Tonnes	204	212	214	243	248	309

\*: Provisional

\*\*: Sectorial Sales

\$: Imports of LNG Net Production=Gross Production-Flared/Losses

Note: 1. Data of Natural gas is reconciled due to change in nomenclature, rationalisation and classification of reporting.

2. The reasons for the variation between the consolidated availability and the consumption can be attributed to stock changes, conversion factor (volume/energy), Flaring/Losses (in case of Natural gas) and the provisional data reported by the companies.

**Table 43:- Important indicators of Industry Division 20,21 (Unincorporated Sector) in 2015-16 (July 2015- June 2016)**

Description	Rural	Urban	Rural + Urban
